QGIS Application - Bug report #3246
Selecting features very fast crashes QGIS

2010-11-23 05:57 AM - zicke -

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Map Canvas			
Affected QGIS version:		**Regression?:**	No	
Operating System:	RedHat	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	13306	

Description

1) Load a polygon layer.

2) Select the "Select features by rectangle" tool.

3) Select and deselect a polygon very fast. Approx. double-click speed.

-> QGIS crashes.

I'm using r14737. This does not happen with 1.5.

History

#1 - 2011-01-07 06:37 AM - Giuseppe Sucameli

Confirmed on Ubuntu 9.10 and QGis trunk commit:c4743a08 (SVN r14998).

1. QGis crashes by just double-click on feature using "select features by rectangle".

2. QGis crashes also using "select features by radius" drawing a one-point circle (I move the mouse for 1px and then back)

#2 - 2011-01-07 08:57 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in . ? grml, missed a round commit again - maybe I'll not make any before we switch to git.
