

QGIS Application - Feature request #3276

Move reuse last values for digitizing to attribute dialog.

Description		
<p>The attached patch moves [copies] the reuse last values check box into the attribute dialog when creating a new feature. I moved this here as you may want to remember the values for a couple of features then turn it off, create some different features, and then turn it back on again.</p> <p>Having it in the attribute dialog makes it a bit easier to selectively choose when you want to remember values for the next time.</p>

Hello, bug triage...

do you still plan to integrate this feature into QGIS attribute forms or should we abandon it for something else ?
