QGIS Application - Bug report #3282
after running r.watershed, when clicking on "view output" is thrown an error message, but the map is added in any case

2010-12-01 10:59 AM - Giovanni Manghi

Status:	Closed			
Priority:	Low			
Assignee:	Redmine Admin			
Category:	GRASS			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Debian	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	worksforme	
Crashes QGIS or corrupts data:		**Copied to github as #:**	13342	

Description

See summary,

the message that pops up is

The layer is not a valid layer and can not be added to the map

but an instant later the map is added anyway.

Using trunk on Ubuntu 10.04

History

#1 - 2011-03-23 03:35 AM - Paolo Cavallini

- Resolution set to worksforme

- Status changed from Open to Closed

Just checked, here it works. Please check again, and reopen the ticket if still valid.

It would be useful if you could shere your data and region settings. A too high resolution might cause this problem.
