Description <p>The window of the "Simplify Feature" tool from the "Advanced Digitizing" toolbar is opened in the center of the screen. This position cause the window to mask the content of the map canva if the geometry you selected was near the center of it.</p> <p>A solution would be to dock the slider in the same way than the tile scale slider so no entities would be hidden.</p> <p>regards, jean roc</p>
