Description

The following comands are not really useful for desktop use, but may be useful for [[MapServer]] use:

- gdaltindex - Build a [[MapServer]] raster tileindex.

- gdal2tiles.py - Create a TMS tile structure, KML and simple web viewer.

- gdal_retile.py - Retiles a set of tiles and/or build tiled pyramid levels.

Hello, bug triage...

on QGIS 2.13, gdaltindex is on Raster -> Miscellaneous -> Tile Index and there is also a Processing Tool (GDAL -> Miscellaneous -> Tile Index).

I think that we should add gdal_retile.py and gdal2tiles.py as Processing tools. The "binaries" are packaged into the main distribution of QGIS.
