QGIS Application - Bug report #3334 Marker line renders wrong on rotate with line.

2010-12-14 04:45 AM - Nathan Woodrow

Status: Closed Priority: Low

Assignee: Martin Dobias
Category: Symbology

Affected QGIS version:

Operating System: Debian

Pull Request or Patch supplied:

Crashes QGIS or corrupts data:

Regression?: No

Resolution: fixed

Copied to github as #: 13394

Description

This is a bug when you select rotate with line but have a marker line defined with two symbols, one or more with offsets.

The problem seems to be that the angles of the symbols are updated correctly but the x and y offsets are not meaning that symbols render incorrectly along the line.

I have attached a picture of the problem. [[Image(http://imgur.com/bSymt.png)]]

History

#1 - 2010-12-14 02:48 PM - Martin Dobias

- Resolution set to fixed
- Status changed from Open to Closed

Fixed in commit:1b69e082 (SVN r14915) - that was actually general problem of marker symbols when having both non-zero offset and rotation.
