

QGIS Application - Feature request #3355
OSGeo4W setup, avira pro reports possible malware

2010-12-19 03:09 PM - Gerhard Spieles

Status:	Closed	Resolution: invalid Copied to github as #: 13415
Priority:	Low	
Assignee:	nobody -	
Category:	Build/Install	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Hi,</p> <p>i have tried to update grass 6.4.0.2 to .3 vs. osgeo4w online installer.</p> <p>My avira pro reports now the first time, that osgeo4w setup contains possible malware.</p> <p>Avira report window is attached.</p> <p>Is this a malfunction of avira?</p> <p>Thanks for an answer.</p> <p>Gerhard</p>

- Resolution set to invalid
- Status changed from Open to Closed

Strange, my avira pro doesn't find any problems.

I also tried <http://www.garyshood.com> (running F-Prot, [[AntiVir]], [[BitDefender]] and [[ClamAV]]) on [grass-6.4.0-3.tar.bz2](#) and [osgeo4w-setup.exe](#) with the same outcome.

Anyway - if it's a problem, it's a OSGeo4W problem.
