

QGIS Application - Feature request #3409

Optional copy of a raster when building pyramids

Status:	Open	Resolution: Copied to github as #: 13469
Priority:	Low	
Assignee:	nobody -	
Category:	Rasters	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
Creating internal pyramids modifies the original file. Wouldn't it be better to rename the original file by default? Maybe adding checkbox (default True) to create backup file would be better.

The is an option (checkbox) "build pyramids internally if possible". If the checkbox is unselected, pyramids aren't always created as an external file (so no modification to the original raster)?
