Category:	C++ Plugins			
Affected QGIS version:		**Regression?:**	No	
Operating System:	All	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10408	

Description

When buffering a [[PostGIS]] layer, the buffer (geoprocessing) plugin fails with:

"Unable to add geometry column to the output table"

History

#1 - 2006-11-11 09:44 AM - Gary Sherman

This fix has been tested with:

  - POSTGIS="1.1.1" GEOS="2.0.1" PROJ="Rel. 4.4.9, 29 Oct 2004"

  - [[PostgreSQL]] 8.1.3

Because of the change in the name of the geometry check constraint created by addgeometrycolumn (from $2 to enforce_geotype_shape) this fix requires a recent version of [[PostGIS]]. The minimum [[PostGIS]] version that will work with this fix is unknown.

Additional testing is needed by other [[PostGIS]]/PostgreSQL version combinations.

#2 - 2006-11-11 09:45 AM - Gary Sherman

- Resolution set to fixed
- Status changed from Open to Closed

#3 - 2009-08-22 12:46 AM - Anonymous

Milestone Version 0.8 deleted
