

QGIS Application - Bug report #3526

Delimited text layers in 1.6.0 project don't load in trunk

2011-02-26 02:52 AM - Donkagen2 -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Project Loading/Saving	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13586
Description		
<p>When trying to load a project, saved under 1.6.0, and containing several delimited text layers into trunk (build 1.7.0-75), a QGIS Project Read Error occurs.</p> <p>When choosing the option to find the layers, the pick dialog box starts with the wrong default directory and with the wrong "files of type" string.</p> <p>For a file "AA.csv", the "Files of type" string is "AA.csv?delimiter=,&delimiter Type=plain&xFiled=X&yField=Y".</p> <p>The missing files can be selected and loaded via this dialog but, for projects with a large number of such layers this becomes tiresome and error prone.</p>		

History

#1 - 2011-03-16 10:47 PM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

fixed in commit:7a9ccbb1 (SVN r15438).
