

QGIS Application - Bug report #3573

Bad layer handler doesn't set project status to dirty

2011-03-08 04:57 PM - Chris Crook

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Project Loading/Saving	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13633
Description		
<p>The bad layer handler is great for fixing up moved or missing files when reloading a project. But after I've relocated the files and updated the datasource, the opened project is not marked as "dirty", so if I then exit I don't get prompted to save the changes.</p> <p>Can this be fixed easily? Or maybe just put up a message to suggest saving the changes if any are made.</p>
