

QGIS Application - Bug report #3591

WMS: add button does not get enabled

2011-03-11 12:56 AM - Richard Duivenvoorde

Status:	Closed	
Priority:	Low	
Assignee:	Jürgen Fischer	
Category:	Web Services clients/WMS	
Affected QGIS version:		Regression?: No
Operating System:	Linux	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13651
Description		
Connecting to this WMS service, the add button seems not to enable, OR it will only enable when you click the 'Top Layer' see http://lists.osgeo.org/pipermail/qgis-developer/2011-March/013323.html Reconstruction: 1) add the service url: http://raster.tnris.org/lizardtech/iserv/ows?request=GetCapabilities&#38;service=WMSx%x% 2) accept the 'advertised url' (by clicking yes) 3) click on the first layer 'BEG_GAT_250K_WGS84' and note that in the status line of the dialog is: 'No CRS selected' 4) click on the 'change' button and select the (only available) crs 'WGS 84' and click OK NOW the Add button should be enabled (I should think...) BUT it is not (in my trunk version r15430) I CAN get the layer loaded now by clicking on the 0-layer (with title Top Layer)... As soon as I click that layer, the Add button get's enabled...?? Don't know what the source is of the error: if there is something wrong with the capabilities. I do see that there is NO csr available at start in the WMS dialog
