| <b>Description</b>                                                                                                                    |                   |                                     |
| If the clipper window is closed before completing the command, a red transparent rectangle is left on the canvas, and is not removed. |                   |                                     |

#### History

##### #1 - 2011-03-22 09:50 AM - Giuseppe Sucameli

- Resolution set to fixed
- Status changed from Open to Closed

I made some changes in commit:a6de6592 (SVN r15563). The issue should be fixed.
