

QGIS Application - Bug report #3688

New raster implementation: interactive transparency selection does not work

2011-03-30 01:19 AM - Tim Sutton

Status:	Closed	
Priority:	Low	
Assignee:	Redmine Admin	
Category:	Build/Install	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13747
Description		
Using Radmin's overhauled raster implementation: - load a raster - open properties - transparency tab - click 'add values from display' (second icon down on right hand side) - click a pixel in the image At this point a new entry should be added to the transparent pixel list, but nothing happens.

fix in commit:297475f8 (SVN r15657)

I delete `[[QgsPixelSelectorTool]]` and use `[[QgsMapToolEmit]]`.
