What are the exact steps to reproduce the problem?

I can load the style file, and transparency is set to None (255). I can also modify the value in the Properties dialog, apply changes, save style in a new file, and upload the new style successfully. But I'm on Fedora, running commit:f8e10a33 (SVN r15725).

#3 - 2011-04-18 03:21 AM - Alexander Bruy

Well, using attached sample after applying mcd45.qml to raster following pixels should be transparent: 0.000000, 9998.000000, 9999.000000, 900.000000, 10000.000000. But they are not transparent. There is only one entry in transparency table -2147483648.00 which is wrong and not used in raster at all.

Probably this is related with #3733

#4 - 2011-12-10 02:10 AM - Radim Blazek

- Assignee deleted (nobody -)

- Pull Request or Patch supplied set to No

Fixed in 3b9b2d87.

Please verify and close.

#3733 is another issue.

#5 - 2011-12-10 02:50 AM - Alexander Bruy

- Resolution set to fixed

- Status changed from Open to Closed

Yes, it's fixed now. Thanks, Radim
