

## QGIS Application - Bug report #3727

### Features not represented with rule-based renderer still get labelled

2011-04-13 12:44 PM - Mayeul Kauffmann

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>		
<b>Category:</b>	Symbology	
<b>Affected QGIS version:</b>	1.7.4	<b>Regression?:</b> No
<b>Operating System:</b>	All	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 13786
<b>Description</b>		
<p>With the rule-based renderer, it is possible to have sets of rules that do not represent some features: if some feature are not matched by any rule (due to a filter or a scale criterion), they are not represented (which is normal), but their labels are still displayed, which is a bug. This affects the old labelling engine and Label-NG, in the map canvas and the map composer.</p> <p>The behavior should be the same as with the categorized renderer: if you delete one of the categories, the corresponding features are no longer represented AND the corresponding labels disappear.</p>		

#### History

For related bugs see <http://trac.osgeo.org/qgis/ticket/3737#comment:2>

**#2 - 2011-12-16 12:45 PM - Giovanni Manghi**

- Target version changed from Version 1.7.0 to Version 1.7.4

**#3 - 2012-02-24 02:04 AM - Mayeul Kauffmann**

- Affected QGIS version set to 1.7.4

- Crashes QGIS or corrupts data set to No

- Pull Request or Patch supplied set to No

- Assignee deleted (nobody -)

Still buggy in 1.7.4 but fixed in current 1.9 master (which commit?)

**#4 - 2012-04-16 06:27 AM - Paolo Cavallini**

- Target version changed from Version 1.7.4 to Version 1.8.0

**#5 - 2012-08-06 05:57 PM - Alister Hood**

The category for this should possibly be "labelling".

But is there even a reason this ticket is still open? It is fixed as far as I can see.

**#6 - 2012-08-12 01:18 AM - Giovanni Manghi**

- Status changed from Open to Closed

- Resolution set to fixed

If is fixed, then we close it :)
