QGIS Application - Feature request #3852
It should be allowed to filter shapefile vector layers by id

2011-05-27 09:11 AM - Sandro Santilli

Status:	Closed		
Priority:	Low		
Assignee:			
Category:	Vectors		
Pull Request or Patch supplied:		**Resolution:**	invalid
Easy fix?:	No	**Copied to github as #:**	13910

Description

It is currently impossible to filter shapefiles by id, but the id is what you get when, for example, you check for topological validity, so you have then no way to take a closer look.

History

Are you saying I can use those fieldnames in the query builder ?

What about making it available in the list of fieldnames you can click on then ?

Would it then make sense for the OGR provider to report the fid field ?

⁇
the field list is also used when editing. so having the ogr provider report special fields, would open other issues...
