

QGIS Application - Bug report #3855

Python console gets stuck if you use [Enter] from the number pad

2011-05-30 01:32 AM - Alister Hood

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13913
Description		
<p>In the Python console:</p> <p>Paste a command, e.g. the line below, and press the [Enter] key in the middle of your keyboard - it should work.</p> <p>Now paste it again and press the [Enter] key in the number pad section of your keyboard - the cursor moves down to the next line, but the command is not run, and there appears to be no way to get it to run, or to exit out with Ctrl-C or something like you can do in most consoles (It seems you need to restart QGIS to use the Python console after this).</p> <pre>print "hello dude!"</pre>

Here is a patch to add handling for the num keypad Enter.

#2 - 2011-06-21 10:13 PM - Alister Hood

Great, thanks.

#3 - 2011-07-05 01:37 AM - Martin Dobias

- Resolution set to fixed
- Status changed from Open to Closed

Thanks for the patch. Applied in commit:2fcf608
