Works for me. Can you give me any specific examples?

Marco

You are right. My bad. I forgot that in Unique Value legend type I can't change the width of all the classified lines in one move. I have modify each my line's width manually. I have filled a wish for a related issue some time ago: <https://svn.qgis.org/trac/ticket/292>

The current need to modify each classified line width, or visibility, separately, is rather a design defect than a bug then.

Propably the tickets should be merged.

Maciek
