

QGIS Application - Bug report #3935

Save File As dialog boxes display "Open" button rather than "Save"

2006-03-28 10:03 PM - Tim Baggett -

Status:	Closed	
Priority:	Low	
Assignee:	Tim Sutton	
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	Fedora	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13959
Description		
<h2>Save As Dialog Boxes Incorrectly Display "Open" Button</h2>		
<p>The following dialog boxes should show a "Save" button rather than an "Open" button.</p> <ul style="list-style-type: none">- File->Save Project As...- File->Save as Image... <p>This is observed with trunk r5105, built with Qt 4.1.1</p>		

History

#1 - 2006-03-28 10:20 PM - Tim Baggett -

I have attached a patch to qgisapp.cpp which I believe fixes this issue for both "save project as" and "save as image" dialog boxes, in addition to two another minor fixes.

- The dialog box is configured to open a file by default. By setting the accept mode to `[[AcceptSave]]`, the "Open" button is now changed to "Save".
- The dialog box is now configured to confirm if the user has selected an existing file to be overwritten. The code that previously performed this check and displayed a warning in `fileSaveAs()` was deleted in favor of the Qt confirmation. There was no corresponding check being performed in `saveMapAsImage()` as far as I could find.
- The `fileSaveAs()` dialog box title is changed to match the existing title in the `saveMapAsImage()` dialog box.

A potential issue I see is that when the user is prompted to confirm overwriting an existing file, the titles are too long and are truncated in the confirmation dialog box.

#2 - 2006-03-29 03:38 AM - Tim Sutton

- *Resolution set to fixed*
- *Status changed from Open to Closed*

Applied patch in revision `commit:4aaf2460` (SVN r5108)

Note that the File->save dialog option still shows 'open' instead of 'save'.

Many thanks for this patch!
