**Description**

In this page

https://issues.qgis.org/projects/qgis-user-plugins

the link that allows to create subprojects (the plugins) is missing, but accessing directly to the form page works

https://issues.qgis.org/projects/new?parent_id=qgis-user-plugins

so should not be a permission problem

**History**

**#1 - 2011-11-24 05:36 AM - Pirmin Kalberer**

*- Pull Request or Patch supplied set to No*

*- Assignee changed from Tim Sutton to Pirmin Kalberer*

*- Status changed from Open to Closed*

A redmine update could solve that.

With the new QGIS Hub Redmine plugin, the default parent project is 'User plugins', which solves the problem for now.
