

QGIS Application - Bug report #406

Copy selected attributes crashes with PostGIS layer

2006-11-27 02:42 PM - Colin-Reed-nrico-com-au -

Status: Closed	
Priority: Low	
Assignee: Gary Sherman	
Category: Vectors	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10465
Description	
Using 0.8.0 preview 2 on Ubuntu 6.06.	
I selected some features from a [[PostGIS]] layer, opened the attribute table, then tried to copy the selected records to the clipboard. QGIS crashed with a segmentation fault. Happens with all [[PostGIS]] layers points, lines or areas.	
Works OK with the shapefile of the same layer.	

History

#1 - 2006-11-28 12:36 AM - Gavin Macaulay -

Works for me with latest svn. Are you able to try the svn version of qgis?

Does anyone else have this problem?

#2 - 2006-11-29 02:24 AM - anonymous -

Replying to [comment:2 g_j_m]:

I'll give it a go and let you know.

#3 - 2006-11-29 05:05 AM - Colin-Reed-nrico-com-au -

I checked out revision 6146, but couldn't get it to compile:

```
g++ -DHAVE_CONFIG_H -I. -I../.. -DPKGDATAPATH=\\\"/home/kol/apps/share/qgis\\\" -I../gui/ -I../ui/ -I../core/ -g -Wall -I/usr/include -DQT3_SUPPORT

Colin

#4 - 2006-11-29 06:26 AM - Marco Hugentobler

Colin,

Your Qt version seems to be < 4.2 (the current minimum version for QGIS)

Marco

#5 - 2006-11-30 04:24 AM - anonymous -

Thanks Marco,

I had 4.1.2. It took me a while to figure out how to get 4.2 installed into the right places, but I finally got the latest svn compiled successfully.

Unfortunately, still the same result! Crash and segmentation fault when i hit the copy button.

When I selected the [[PostGIS]] layer I got a few error dialogs saying:

```
Could not open SRS database /resources/srs.db
Error(14): unable to open database file
```

but it plotted OK. Selected a single line feature, opened the attribute table, moved the selected feature to the top, clicked the copy button:

...

```
Debug: qgspostgresprovider.cpp: 726: (getFeatureAttributes) [[QgsPostgresProvider]]::getFeatureAttributes using: select * from
"public"."GEODATA_250k_coast" where "oid" = 607568
Debug: qgspostgresprovider.cpp: 726: (getFeatureAttributes) [[QgsPostgresProvider]]::getFeatureAttributes using: select * from
"public"."GEODATA_250k_coast" where "oid" = 607569
Debug: qgspostgresprovider.cpp: 845: (reset) Setting up binary cursor: declare qgisf binary cursor for select "oid",asbinary("the_geom",'NDR') as
qgs_feature_geometry from "public"."GEODATA_250k_coast"
WARNING: there is no transaction in progress
Debug: qgsmaplayer.cpp: 127: (name) [[QgsMapLayer]]::name: returning name 'GEODATA_250k_coast'
Warning: selecting row with id 606635
Debug: qgspostgresprovider.cpp: 726: (getFeatureAttributes) [[QgsPostgresProvider]]::getFeatureAttributes using: select * from
"public"."GEODATA_250k_coast" where "oid" = 606635
Debug: qgspostgresprovider.cpp: 789: (getFeatureGeometry) [[QgsPostgresProvider]]::getFeatureGeometry using: declare qgisf binary cursor for select
```

asbinary("the_geom",NDR') from "public"."GEODATA_250k_coast" where "oid" = 606635

WARNING: there is already a transaction in progress

[[QgsClipboard]]::replaceWith: replaced QGIS clipboard.

Segmentation fault

BTW [[PostGIS]] is v 1.1.6 and postgresql is 8.1.5

Thanks,

Colin

#6 - 2006-11-30 09:26 PM - Gavin Macaulay -

Can you attach a backtrace?

#7 - 2006-12-01 02:40 AM - Colin-Reed-nrico-com-au -

This is from strace (tail end)- is this OK?

Colin

#8 - 2006-12-01 11:31 AM - Gavin Macaulay -

A backtrace would be better. Something like this should work:

```

tssh
limit coredumpsize unlimited
qgis
gdb /path/to/qgis core.XXXXX
bt

```

where core.XXXXX is the name of the coredump file that is generated when qgis crashed. The first 10 or 15 lines from the bt command are all that are required.

#9 - 2006-12-01 01:25 PM - Colin-Reed--nrice-com-au -

Thanks for that. I haven't done this before.

Here it is:

Colin

#10 - 2006-12-01 02:17 PM - Gavin Macaulay -

A potential fix is available in svn commit:49658807 (SVN r6167).

If you're able to checkout and compile up the latest qgis, please do so and see if the problem has been fixed.

The backtrace suggests that some of the geometries in the postgres database are empty.

#11 - 2006-12-01 09:11 PM - Colin-Reed-nrico-com-au -

OK, that stops it from crashing, but I don't think there should be any null geometries. I checked in [[PostGIS]] by selecting where the_geom is null and it didn't find any. I selected a single feature from the map then copied from the attribute table and had a NULL as the geometry for that record, but it is plotting on the screen so it shouldn't be null.

After a bit of experimentation I found that if I selected a feature and it came up with a null geometry, if I inverted the selection, then inverted it again, it worked OK and the geometry showed up in the pasted text.

Maybe it's not talking to Postgis properly when it's initially fetching the geometries? The null shows up as the first record in each case and it seems in each case that the null's appear there is a warning message about a transaction already in progress:

```
Debug: qgspostgresprovider.cpp: 789: (getFeatureGeometry) [[QgsPostgresProvider]]::getFeatureGeometry using: declare qgisf binary cursor for
select asbinary("the_geom",'NDR') from "public"."GEODATA_250k_coast" where "oid" = 607202
*WARNING: there is already a transaction in progress*

```

Thanks,
Colin

#12 - 2006-12-01 09:33 PM - anonymous -

The NULL in the copied text is something I made qgis put in when it finds an empty geometry, but real problem is why qgis gets an empty geometry in the first place. I'll look some more.

#13 - 2006-12-02 12:20 AM - anonymous -

- *Resolution set to fixed*
- *Status changed from Open to Closed*

Fixed in svn . Thanks for the backtrace and debugging messages, Colin - they allowed me to work out how to reproduce the problem and hence fix it.

#14 - 2006-12-03 02:34 PM - Colin-Reed-nrico-com-au -

The fix works fine for me too.

Thanks!

Colin
