Crashes QGIS or corrupts data:		**Copied to github as #:**	14046	

Description

After working around #4060, building the globe plugin under MSVC fails like this:

2>LINK : fatal error LNK1104: cannot open file 'QtOpenGL.lib'

I have worked around it by manually changing the linker settings to point to C:\\OSGeo4W\\lib\\QtOpenGL4.lib
