Pull Request or Patch supplied:		**Resolution:**	worksforme	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10467	

Description

Hi,

when visualizing a LANDSAT RGB set as GRASS group, the color tables of the bands are ignored. When opening the group members (r, g, b band) separately, they are respected.

There seems to be a difference between (src/plugins/grass)

    qgsgrassselect.cpp: selectedType = [[QgsGrassSelect]]::GROUP;

and

    qgsgrassselect.cpp: selectedType = [[QgsGrassSelect]]::RASTER;

in this regard.

Best,
Markus
