QGIS Application - Bug report #4097
Referenced layers (embedded layers) do not maintain visibility state

2011-07-19 09:26 AM - Andreas Neumann

Status:	Closed		
Priority:	Normal		
Assignee:	Marco Hugentobler		
Category:	Project Loading/Saving		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	all	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	14079

Description

When embedding/referencing groups or layers from other projects, their visibility state is not maintained when saving and reloading the project.

In some cases it may be desirable to reference a group but set it to invisible. Currently, the root of the referenced group shows the correct visibility state, but all childs are always visible after a reload.

Associated revisions

Revision b49da36c - 2015-01-13 02:55 PM - Jürgen Fischer

- Save and restore visiblity state of embedded group layers (fixes #4097)
- Adds support for lists in custom properties

commit:d02c4bef94be82dca4a4 considers visibility for embedded groups and their sublayers.
For single embedded layers, the implementation needs more thinking because the visibility is not stored in the layer element itself.

#3 - 2011-12-16 02:11 PM - Giovanni Manghi

- Target version set to Version 1.7.4
