<p>I was doing a tutorial and tried to join a CSV file and a Shapefile, and kept getting this error message:</p> <p>Failure creating output shapefile C:\\Program Files\\Quantum GIS Wroclaw\\joined.shp creation of layer failed (OGR error:Failed to open Shapefile `C:\\Program Files\\Quantum GIS Wroclaw\\joined.shp').</p> <p>Everything I did followed the tutorial (http://www.projo.com/temp/tim/nicar/qgis_tutorial/#24), so I'm not sure what I'm doing wrong.</p>

Dan - I encountered a similar issue. Windows doesn't like non-Admins to save things to the C:\\Program Files\\ directory. Have you tried changing the path where you're saving the files? This solved the problem for me.

Alternate resolution: suggest feature to be able to set a default "working folder" path.
