

## QGIS Application - Bug report #4108

### Switching from new to old polygon symbology then back again ends up with polyline symbology

<b>Description</b>		
<p>Using new symbology, style a polygon layer with only an "Outline: ..." style.</p> <p>Switch the layer to old symbology and do not apply the changes.</p> <p>Switch back to new symbology - the dialogue now gives the options for a polyline layer, not a polygon layer!</p> <p>Click "Apply" - the layer will now be invisible!</p> <p>BTW, is the "outline" style really necessary? Can't you achieve the same result with the simple "fill" style?</p>
