

QGIS Application - Bug report #4125
Multilinestring -> linestring failure?

2011-08-01 08:05 AM - tmitchell -

Status:	Closed	
Priority:	Normal	
Assignee:	cfarmer -	
Category:	Processing/QGIS	
Affected QGIS version:	master	Regression?:
Operating System:	OSX	Easy fix?:
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	No	Copied to github as #: 14106
Description		
<p>Take the attached shapefile "Line.shp", load it as a layer, select Vector-> Geometry Tools -> Multipart to Single parts. Choose "Line" layer, select and output, select OK. The result, when confirmed with "ogrinfo -al" shows it's still multipart.</p> <p>Am I expecting too much from the tool or is it a bug? I noticed the problem since I was using the great line->poly tool - which then created polys for each multipart feature, a real mess with this file :)</p> <p>Thanks for any help!</p>		

History

#1 - 2011-10-15 04:51 AM - Giovanni Manghi

- File single_shp.zip added
- Target version deleted (Version 1.7.0)
- Status changed from Open to Feedback

I have just tested and the result is a linestring for me (checked also with PostGIS). Please check and leave feedback.

#2 - 2011-12-16 02:12 PM - Giovanni Manghi

- Target version set to Version 1.7.4

#3 - 2012-01-28 04:14 PM - Giovanni Manghi

- Status changed from Feedback to Closed
- Crashes QGIS or corrupts data set to No
- Affected QGIS version set to master
- Resolution set to worksforme

Closing for lack of feedback. Reopen if necessary.

#4 - 2017-05-01 01:22 AM - Giovanni Manghi

The "ftools" category is being removed from the tracker, changing the category of this ticket to "Processing/QGIS" to not leave the category orphaned.
