

QGIS Application - Bug report #4166

New labelling does not display some labels

2011-08-12 09:37 AM - James Stott

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:		Regression?: No
Operating System: Windows		Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 14143
Description		
<p>There have been two threads on QGIS in the last two weeks with people having problems with labels not showing using the new labelling tool. See</p> <p>http://gis.stackexchange.com/questions/12758/when-labelling-polygons-not-all-labels-are-displayed-qgis-1-7-0 http://gis.stackexchange.com/questions/13518/how-to-move-labels-in-qgis-using-the-old-labelling-method</p> <p>In my case (the 2nd link) I have 2 or 3 polygons that refuse to show labels, even when I set Show All Labels in the Engine settings. They show using the old labelling method.</p> <p>I am using QGIS 1.8 on Windows XP. I can supply sample if needed.</p>		

History

Please provide some sample data. Maybe some of the polygons do not have a valid geometry and the labeling fails for them.

#2 - 2011-08-15 12:53 AM - James Stott

The problem is exactly that. I ran the check geometry validity tool and it found two errors. I fixed these, and the labels show.

#3 - 2011-08-15 03:21 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed
