

QGIS Application - Feature request #4208

Move New Memory Layer plugin to core

2011-08-22 06:19 PM - Nathan Woodrow

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 14172
Priority:	Normal	
Assignee:		
Category:	Vectors	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>The ability to add new memory layers, provided by the New Memory Layer plugin, is a handy function for the creation of quick layers which can then be saved to shape later.</p> <p>IMO this functionality should be moved to the core program under Layer->New->New Memory Layer. Using a UI similar to the New Shapefile would be ideal.</p>		

History

Imho much better would be one dialog for all vector providers, without mandatory field creation. The plugin was just a quick temporary solution.

#2 - 2012-10-06 02:15 AM - Pirmin Kalberer

- Target version changed from Version 2.0.0 to Future Release - Nice to have

#3 - 2015-10-13 05:23 AM - Nyal Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Implemented since a while back
