

QGIS Application - Bug report #424

QGIS 0.8 Preview 2 project with PostGIS Layer is not reloadable

2006-12-06 01:41 AM - Redmine Admin

Status:	Closed	
Priority:	Low	
Assignee:	Gavin Macaulay -	
Category:	Project Loading/Saving	
Affected QGIS version:		Regression?: No
Operating System:	RedHat	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10483

**Description**

A prject saved with QGIS 0.8 Preview 2 containing a [[PostGIS]] layer is not reloadable. The [[PostGIS]] provider responses with an error message:

ERROR: zero-length delimited identifier at or near """" at character 15

.

SQL: select \* from "" limit 1

The reason of this message is a change of the project file syntax.

QGIS 0.8 Preview 2:

<datasource>host=localhost dbname=sogis port=5432 user=username password= table=public.standort (wkb\_geometry)  
sql=archive=0</datasource>

changed to

QGIS 0.8 Rev 6193

<datasource>host=localhost dbname=sogis port=5432 user=username password= table="public"."standort" (wkb\_geometry)  
sql="archive"=0</datasource>

Adding the double quotes let QGIS 0.8 Rev 6193 load the project.

**History**

#1 - 2006-12-06 11:58 AM - Gavin Macaulay -

- Status changed from Open to In Progress

#2 - 2006-12-07 01:07 AM - Gavin Macaulay -

- Resolution set to fixed

- Status changed from In Progress to Closed

Fixed in svn commit:17090c65 (SVN r6200)

#3 - 2009-08-22 12:46 AM - Anonymous

Milestone Version 0.8 deleted
