

QGIS Application - Bug report #426

Qt include and lib dir

2006-12-07 03:36 AM - anonymous -

Status: Closed	
Priority: Low	
Assignee: Gary Sherman	
Category: Build/Install	
Affected QGIS version:	Regression?: No
Operating System: Gentoo	Easy fix?: No
Pull Request or Patch supplied:	Resolution: wontfix
Crashes QGIS or corrupts data:	Copied to github as #: 10485
Description	
<p>On Gentoo system I have qt-4.2.1 with includes in /usr/include/qt4/ and libs in /usr/lib/qt4/</p> <p>./autogen.sh for 7.12.2006. HEAD w/o any params fails to find Qt,[[br]] with --with-qt-dir=/usr fails to find Qt libs (includes are OK),[[br]] with --with-qt-pkg-config fails to make due to wrong include path (/usr/include/ and not /usr/include/qt4/)</p>	

History

#1 - 2006-12-07 03:49 AM - Martin Dobias

- Resolution set to wontfix
- Status changed from Open to Closed

Gentoo users have trouble with this due a bit unusual Qt4 installation. I've added that --with-qt-pkg-config configure option, but it was doing problems with some platforms and/or distributions. Thus it's disabled by default and you must patch it - with this patch:

<http://bugs.gentoo.org/attachment.cgi?id=102166&action=view>
