

## QGIS Application - Bug report #4269

### dxfs2shp truncate the conversion of the last polyline

2011-09-07 01:48 AM - Carmelo Viavattene

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>		
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 14209
<b>Description</b>		
the bug is easy to reproduce: 1 polyline into a DXF file does not provide anything, if you have 2 polylines, only the first is converted, etc.		

#### History

##### #1 - 2011-09-07 01:51 AM - Paolo Cavallini

The plugin is obsolete, and will be dropped. Please open your DXF directly (you need a recent OGR though)

##### #2 - 2011-09-07 01:55 AM - Carmelo Viavattene

In italiano: come devo aprire il DXF direttamente da dentro QGIS?

In english: how do I open the DXF files directly from within QGIS?

*In english: how do I open the DXF files directly from within QGIS?*

as any other vector, just select the right format in the dropdown

##### #4 - 2011-09-07 02:02 AM - Carmelo Viavattene

italiano: Trovato.

english: found.

Thank You!

Please, close, this is not a bug

##### #5 - 2011-09-07 02:05 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed
