QGIS Application - Feature request #4275 Strip off file extension for layer name when adding via the Browser pane

2011-09-09 03:18 AM - Alister Hood

Status: Closed

Priority: Low

Assignee:

Category: GUI

Pull Request or Patch supplied: Resolution: worksforme

Easy fix?: No Copied to github as #: 14215

Description

When adding a file by dragging and dropping into the Layer control, or by using "Layer-Add...", the file extension is stripped off to create the layer name displayed in the layer control.

When adding a file by double-clicking on it in the browser pane, the file extension is not stripped off.
