

QGIS Application - Feature request #4278

Add -t option to v.in.ogr.qgis

2011-09-10 09:07 PM - Aren Cambre

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 14218
Priority:	Normal	
Assignee:		
Category:	GRASS	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>If I make a new GRASS layer, it's relatively inefficient for me to pull over all attributes in addition to points. The -t option is supposed to prevent importation of attributes. Can that be added to the UI for v.in.ogr.qgis?</p>		

History

#1 - 2011-09-11 01:40 AM - Giovanni Manghi

- Tracker changed from Bug report to Feature request
- Target version set to Version 1.7.1
- Operating System deleted (Windows 7 x64)

Changing the GRASS modules UI interface is pretty easy as the configuration files are a kind of xml. Please consider create patches and submit them.

Thanks, but where is v.in.ogr.qgis even documented? From the best I can tell, all it does is prepare arguments for v.in.ogr.

(Sorry for mis-filing the ticket!)

Hi, the ticket is not-filed, it a legit request. I just suggested to have a look how modules GUI files look like and then propose a patch.

Hello, bug triage...

in QGIS 2.13 (and probably in previous versions), there is an option in v.in.ogr.qgis to disable attributes import. When this option is checked, v.in.ogr is called with the -t option.

I am closing this feature request.
