

QGIS Application - Bug report #4282

Wrong map zooming when using the "Attribute Table" zoom tool.

2011-09-13 11:44 AM - Thaddeus -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:		Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 14221
Description		
Testing this on QGIS 1.7.0, Win2k box: works OK on 1.6 version: regression.		
The problem: one clicks on a feature found in South America and the map canvas zooms to Africa ?		
It's worth noting that the CSV has some botched up conversion/parsing and contains missing coordinates that end up as lat 0.0 and lon 0.0, a kind of boundary condition, but that is a valid lat-long pair, anyway, it worked OK on QGIS 1.6.
