Description

Methods to save a file are different in different commands and plugins, e.g.:

- sometimes the file extension has to be chosen, sometimes not
- sometimes the file format cannot be chosen (e.g. for interpolation plugin)
- the target directory is not always the same.

We should have an uniform method, and use it consistently.

Similarly for Open file.

- Easy fix? set to No

#6 - 2018-01-29 07:20 PM - Paolo Cavallini

- Description updated

We should make it clear the Processing approach is the one to follow, also in plugins.

#7 - 2018-03-07 04:17 PM - Paolo Cavallini

- Resolution set to worksforme

- Status changed from Open to Closed

Now (QGIS 3) core plugins have been moved to Processing, so probably this ticket is useless.
