Category:				
Affected QGIS version:		Regression?:	No	
Operating System:		Easy fix?:	No	
Pull Request or Patch supplied:		Resolution:	duplicate	
Crashes QGIS or corrupts data:		Copied to github a	Copied to github as #: 14273	
Description				
A map exported	from the composer as PDF will be	several times larger if the labels in the	project have buffers.	
For example, a s	imple map that exports with unbu	ered text to a 1.7 MB PDF will become	e a 17 MB PDF when the labels are buffered.	
This is on 1.7.0 o	on OS X Leopard.
