QGIS Plugin Site - Feature request #4356
API for uploading new versions of plugins

2011-10-06 09:51 AM - Martin Dobias

Status:	Closed	
Priority:	High

Pull Request or Patch supplied:	No	

Description

In my opinion one reason why many developers did not use the old plugin repository was that it was slightly inconvenient to upload new versions - visit the site, login, find the plugin (only 10 plugins per page), edit plugin details, find the zip file, upload. Having a simple API accepting POST requests (consisting of username, password, plugin name, changelog and zip file) would be very handy - that would allow a simple command line tool for deploying of plugins, completely automating the process of packaging and uploading.
