QGIS Application - Feature request #4405
Updates to the field calculator context help

2011-10-19 12:11 AM - Alister Hood

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Documentation and Help		
Pull Request or Patch supplied:	Yes	**Resolution:**	fixed
Easy fix?:	No	**Copied to github as #:**	14337

Description

This patch set adds help for recently implemented functions as well as translating some terms into English ;) or just more plain English.

I also think the second to last existing entry (+a) should possibly be removed, unless it can be explained better.
We might also consider replacing "Arc" with "Inverse ".

And it also fixes some formatting.

#2 - 2011-10-19 11:56 PM - Alister Hood

- File 0001-FieldCalculator-context-help-make-formatting-consist.patch added

Oh, here's another one, to make the formatting consistent.

Alternatively we could identify the other function arguments which are strings, making make them all italics, to distinguish them from the function arguments which are numbers. The only problem is that some are neither a string nor a number ('column_name' and the second and third arguments to regexp()).

#3 - 2011-12-16 02:11 PM - Giovanni Manghi

- Target version set to Version 1.7.4

#4 - 2012-02-01 07:06 AM - Alexander Bruy

- % Done changed from 0 to 100

- Status changed from Open to Closed

Fixed in changeset commit:"e23450e97c1512b790392ee7d0977848e6d4a38f".

#5 - 2012-02-01 07:07 AM - Alexander Bruy

- Resolution set to fixed
