QGIS Application - Bug report #4411
Silent WMS errors

2011-10-19 04:55 AM - Sandro Santilli

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Web Services clients/WMS		
Affected QGIS version:		**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	14343

Description

Whenever a WMS interaction goes bad for any reason (in my case the WMS server advertises wrong service url, resulting in timeout or arbitrary data coming back) such exception produces no user feedback, leaving the user on his own on debugging the issue.

It'll help if errors would generally be somewhat more noisy, on a default build.

The idea of an "errors console" might help here, as long as even with such console not visible there would be a widget to signal presence of error/warning/info messages.
Will reserve more comments about an "error console" in the appropriate ticket, if there is one.

History

#1 - 2011-12-02 01:21 PM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

implemented in commit:2ab61ff64fedd01a1da6b53c4440605f2e2ec57e
