

## QGIS Application - Feature request #4455

### Feature: update map extent when changing project CRS

2011-10-27 11:39 PM - Alister Hood

<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> duplicate
<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 14385
<b>Description</b>  (I thought there was already a ticket for this, but I can't find it)  Currently, if on-the-fly CRS conversion is enabled, when the project CRS is changed the coordinates of the map extent stay the same, so the map ends up showing a completely different real-world location. The map extent should automatically change so that the real-world map extent stays the same.  1) This behaviour would be a lot more user friendly. 2) It would fix what I suspect is the most common cause of endlessly repeating "forward transform" errors (which force users to kill QGIS, potentially losing work they have done).		

#### History

##### #1 - 2011-10-27 11:40 PM - Alister Hood

- Category set to Projection Support

Sorry, I'm not sure whether the right category is Gui or Projection Support or what.
