QGIS Application - Bug report #446
QGIS does not recognize GISDBASE (svn 6239)

2006-12-12 02:34 AM - anonymous -

Status:	Closed			
Priority:	Low			
Assignee:	Redmine Admin			
Category:	GRASS			
Affected QGIS version:			**Regression?:**	No
Operating System:	Debian		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	invalid
Crashes QGIS or corrupts data:			**Copied to github as #:**	10505

Description

If I run QGIS out of GRASS, at the start it asks the path of GISDBASE but if doesn't recognize the directory. Using GRASS plugin to set the GISDBASE the output say:

Cannot open the mapset. Cannot start /home/Documenti/datigrass//etc/lock

History

#1 - 2006-12-12 05:20 AM - Redmine Admin

- Resolution set to invalid

- Status changed from Open to Closed

Most probably it asks for GISBASE (where GRASS is installed) and not for
GISDBASE (where GRASS data are stored).
I presume that you have selected GISDBASE (I see 'datigrass' in the path)
instead of GISBASE. This is not bug in QGIS.
