QGIS Application - Bug report #4478
Actions using %% do not work from identify results

2011-11-01 09:00 AM - Gary Sherman

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Vectors		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:		**Copied to github as #:**	14405

Description

Actions that use two percent signs work fine from the attribute table but do not work properly from the identify results dialog. Instead of replacing the two percent signs with the field value it seems the first field (or perhaps the id) field is used instead. This has been confirmed on 1.7.1 and master.
