QGIS Application - Bug report #45
new added field isn't in label

2006-04-03 07:54 AM - jobi-users-sourceforge-net -

Status:	Closed			
Priority:	Low			
Assignee:	Gary Sherman			
Category:	Vectors			
Affected QGIS version:		**Regression?:**	No	
Operating System:	All	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10104	

Description

I added a new field 'name' with some text to a GRASS
layer and then wanted to display this as label.
But it doesn't appear in the label dropdown of the
preferences of this layer.

History

#1 - 2006-04-03 07:57 AM - Radim Blazek

This is because vector properties dialog is created
once for vecter layer and it is not updated when
data source changed.

#2 - 2006-04-03 07:59 AM - Marco -

This problem will be solved once the vector layer properties
will not be
stored any more (after 0.7). If the properties dialog is created
for each
reopen, it will always have the most recent list of attributes
for a layer.

It's easy enough to create a new vector layer properties dialog box each time the user requests it - there would be a slight time delay though. Is this
something that people think is a reasonable thing to do, or should we consider something a bit more sophisticated?

#4 - 2006-05-06 11:12 PM - Gavin Macaulay -

This may be resolved in SVN . I'm unfamilair with grass, so can someone try it?

#5 - 2006-08-10 09:19 AM - anonymous -

- Status changed from Open to Closed

- Resolution set to fixed

Fixed in revision 5686.
