

QGIS Plugin Site - Bug report #4508

user image is missing from planet pages

2011-11-09 05:18 AM - Alessandro Pasotti

Status:	Open	
Priority:	Normal	
Assignee:	Tim Sutton	
Category:		
Pull Request or Patch supplied:	Not supplied	
Description		
See top right in page: http://users.qgis.org/planet/tag/thematics/ the missing image is: http://users.qgis.org/static/feedjack/default/img/faces/woostuff.png which leads to 404 I'm not sure if it's just a matter of hiding the IMG tag (template stuff) if the image is missing or if this is a bug somewhere in feedjack.
