

QGIS Application - Feature request #4542
ColorBrewer color ramps: better GUI organization

Status:	Open	Resolution: Copied to github as #: 14458
Priority:	Low	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
ColorBrewer ramps belong to 3 different types: sequential, diverging and qualitative. In the current GUI they are all mixed. Better to divide them in submenus. Additionally, better use the max number of categories as a default (this is likely more useful for the user).

Hello, bug triage...

this is an old bug and I am not sure to understand everything.
In QGIS 2.13, color ramps are not classified (as far as I can see in the style manager). So it seems that the bug is unfixed. Or did you mean something else ?

#7 - 2015-12-05 05:57 AM - Paolo Cavallini

Correct, it is not fixed. Thanks.
However, now CB ramps are included in cpt-city section, where they are classified. Perhaps the CB submenu could be removed after all.
