QGIS Application - Bug report #4558
request and letter with accent

2011-11-22 01:49 AM - Gilles Turgeon

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Data Provider			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	14471	

Description

The request constructor (Properties, General) in 1.7.1 don't recognize characters with accents in data field of SQL request ("DESCRIPTIO"='milieu boisé' by exemple). It return 0 object same if objects of this type are presents in data. 1.5 and 1.6 were working fine. I don't know for 1.7.0. The bug is present in 1.7.1 and 1.7.2.

- Status changed from Open to Feedback

which version of GDAL are you using? Should work with GDAL >=1.8

#4 - 2011-12-26 11:08 AM - Gilles Turgeon

I am using GDAL 1.8.1 on QGIS 1.7.3, Windows version. The bug is present.

The bug was present in
- GDAL 1.8.1 on QGIS 1.7.2
- GDAL ??? ib QGIS 1.7.1

The bug WAS NOT present in :
- GDAL ? QGIS 1.6
- GDAL ? QGIS 1.5

Not sure for the precedent versions. I was just evaluating QGIS at this time.

#5 - 2011-12-26 11:12 AM - Alexander Bruy

Seems duplicate #4227

#6 - 2011-12-26 11:49 AM - Gilles Turgeon

It's seems.

I follow the suggestion of 4227 (load data set and save it as UTF-8) and the request now select data with accent in the data field.
