QGIS Application - Bug report #4633
"Save as...DXF" does not add file extension

2011-12-12 03:39 AM - elcuco -

Status:	Closed		
Priority:	High		
Assignee:			
Category:	Project Loading/Saving		
Affected QGIS version:		**Regression?:**	No
Operating System:	Ubuntu	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:		**Copied to github as #:**	14534

Description

When saving a layer to DXF, using the "Save As" command, the file extension (my_file.dxf) is not automatically added, only the first letter (my_file.d). This is not readable by CAD software....

Best regards,

Pedro

I guess it's the same bug. I've updated my QGIS to 1.7.3 and it still not "Save As" properly to DXF... the bug remains.
