

QGIS Application - Feature request #4637

Multiple labels on long polylines

2011-12-12 10:46 PM - Denis Rouzaud

Status:	Closed	Resolution: Copied to github as #: 14538
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>When having a long polyline, it is useful to place several time the same label along the line. Right now, it is possible to avoid the creation of the label if the line is shorter than a threshold. What would be great is to define ranges:</p> <p>Distance # items</p> <p>< 10m 0</p> <p>10< <50 1</p> <p>>50m 2</p> <p>To do this, the use of fields to save the placement of labels should be changed and use a MULTIPOINT geometry. I see one problem: how to save orientation and distance fields if there are several labels.</p>
